COMMERCIAL REBATE PROGRAM HVAC Replacement Incentives

To Calculate Your HVAC Rebate

$$\text{Unit Quantity} \times \text{Unit Tonnage} \times \text{Incentive (\$/ton based on unit efficiency)} = \text{Total Rebate}$$

For example, if you are installing two 10-ton AC package units at 11.8 EER:

$$2 \text{ units} \times 10 \text{ tons} \times \$30/\text{ton} = \$600$$

Split System or Package Unit – AC or Heat Pump (smaller than 20 tons)

Due to building code, units less than 5.42 tons are rated using Seasonal Energy Efficiency Rating (SEER) and larger units use Energy Efficiency Rating (EER).
